trackball

KRAFT®

Trackball Data

Designed for use on the IBM PC, XT, AT and 100% compatible systems using DOS 2.0 or higher. It comes with a 9-to-25 adapter cable for installation on any RS232 serial port. The trackball requires a 5.25 inch floppy disk drive for installation of the Microsoft Mouse compatible software driver. Driver is included. Software-adjustable dots-per-inch (D.P.I) resolution from 10 D.P.I. to 1150 D.P.I. A minimum memory capacity of 128K is required.

KRAFT® SYSTEMS INC.

450 W. California Ave.
Vista, CA 92083

Made in Taiwan

Kraft Systems is the leading manufacturer of computer joysticks, input devices and related computer peripherals. Kraft invented the IBM and Apple joystick and the related technology. We hold numerous patents which support this claim. With Kraft systems, you can be assured that you are purchasing products of the highest calibre. For all your computer needs . . . Kraft Systems.

KRAFT®

Take Control — Join the Revolution

Though they may look different, all mice are the same. The Kraft Trackball is the professional difference. Almost conservative, it is the best input answer for all computer users. And because it mimics a mouse, it will work with most existing mouse software. And then some.

KRAFT trackball

The Kraft Trackball: A Revolution in the Making.

Breaking All Barriers

Control and manage your computer! Touch the Kraft Trackball and feel its smooth ergonomic design and hi-tech response. Precisely the way to be in control.

Whether you are publishing a business report, tracking your stock portfolio, designing your dream office, or just painting a picture, the Kraft Trackball gives you more control. Some games play even better too!

Save Work Space

A mouse demands a lot of real estate in order to work properly. The Kraft Trackball fits right beside your keyboard, never asking for more of your precious desk space. It's downright efficient.

Selective Sensitivity for Trackball Control

And then there is D.P.I. That's Dots-Per-Inch. How fast the computer responds to your movement. Most mice have a respectable 200 D.P.I. Some even have 340 D.P.I. The Kraft Trackball has a base of 200 D.P.I. which is adjustable to 10 D.P.I. or to 1150 D.P.I. or to anything in between. Our Speed Panel lets you set the Kraft Trackball's D.P.I. to whatever is comfortable to you. The Kraft Trackball; you can feel the difference.

Evolution Technology Rolls On

In Business, Graphics, and all mouse-drive applications, the Kraft Trackball has the speed and accuracy necessary to roll over your cursor control problems. The Kraft Trackball delivers control everytime.

☐ Exceptionally easy to install, the Kraft Trackball requires very little computer knowledge or expertise. Just insert the disk and follow the menu driven instructions, step-by-step. Install it once — you're ready to go every time you turn the computer on.

☐ Microsoft compatible. Software driver included.

☐ Opto-Mechanical design and durable space-age construction. Your Kraft Trackball will keep running for years. And our five year limited warranty is backed by over 27 years of Kraft's experience and commitment to quality.

☐ Total one-handed control. It's real. The Kraft Trackball offers the option of an ergonomically designed foot control, freeing your fingers to do what they do best — Move you Ahead.

KRAFT PRODUCT REPAIR/ REPLACEMENT PLAN

Because of Kraft's commitment to quality, most of our customers never need to use our repair/replacement service. But if a Kraft product ever does prove defective, it will be repaired or replaced at no charge during the warranty period.

If you think you have a defective product, please:

1.) Collect all of the information you can about the problem. Make notes about any on-screen messages you get when the problem occurs.

2.) With your Trackball and User's Guide close at hand, call our Product Support staff at (619) 724-7146. In most cases, your question(s) can be answered right away.

3.) If your Trackball is diagnosed as defective, the Product Support representative will refer you to our Customer Service Department. A Customer representative will issue you a return materials authorization (RMA) number to be included on the Product Repair/Replacement Card.

4.) Package the Product Repair/Replacement Card, the defective product, a photocopy of your proof-of-purchase, and full details about the problem in a protected box and mail it directly to Kraft.

KRAFT TRACKBALL ACCESSORIES

PROGRAMMER'S MANUAL
$17.00
The Programmer's Manual for the Kraft Trackball contains the information necessary to incorporate a sophisticated trackball interface into your programs. It contains a complete description of the trackball driver and sample source code which enables you to integrate the Kraft Trackball into your applications.

FOOTPEDAL
$19.95
Ergonomically designed footpedal gives you total one-handed control. Plugs directly into your Kraft Trackball; no additional hardware required!

TELEPAINT-CGA
$49.95
TelePaint, the graphics program, combines a computer canvas with pop-up menus to allow the creation of electronic paintings on 8-1/2 by 11 inch pages. TelePaint requires an IBM PC or compatible computer, 256K of memory, DOS 2.0 or higher, a CGA, and your Kraft Trackball. Suggested retail price: $79.95.

SPLASH!-VGA
$59.95
Splash! turns your mouse into a paint brush, your monitor into a canvas, and supplies you with color and paint options that go beyond your wildest imagination. It comes with a palette of over 256,000 colors, 60 patterns and brush sizes, color fills, stamps, and spray cans. Splash! requires an IBM PC or compatible computer, 640K of memory, DOS 2.1 or higher, an MCGA or VGA, and your Kraft Trackball. Suggested retail price: $99.95.
